Dear Employer,

I'm Adem Karagülle, graduated from Yıldız Technical University, Department of Civil Engineering. During my education at the university, I became interested in the field of software thanks to the courses I took and the projects I examined. Therefore, I took a frontend course and am currently improving myself in this area.

I know languages such as HTML, CSS, Bootstrap, JavaScript, React, Photoshop and Wordpress and I use these languages effectively in my projects. Using these tools, I have a strong background to building and designing websites.

I believe that by working in your company, I will further develop myself and contribute to your business. I am open to innovations and learning, I attach importance to teamwork and I can take responsibility. Therefore, I look forward to working as a frontend developer at your company.

Thank you for your interest and I hope we can have the opportunity to work together.

Adem Karagulle
